Hi – a lot looks good, but

Check T&D in assumptions you use 2160 tons – on IGCE summary you use 1600; restoration estimate on assumptions was total \$33,960 (you can combine the fill materials on the summary since you have it described in assumptions) – you can keep command post in or take it out – just make sure numbers match. thanks

Jo, Can you please review and let me know what I am missing...

Thanks...

With Regards, Steve
